

Senior .NET Software Developer

Axiom Innovations is a fast-growing business automation, process engineering and software solutions company. Our work and products are award winning. In 2024 & 2023, our flagship product Scarlett received the Mortgage Awards of Excellence for Best Product & Innovation.

Our work is focused on banking, mortgage origination and management, lending services, real estate and government.

Job Title: Senior .NET Software Developer

Location: Toronto / Remote

Job Type: Full Time / Contract

Department: Software Development

About the Role

We are seeking a highly skilled **Senior .NET Software Developer** to join our development team. In this role, you will be responsible for **designing, developing, and optimizing enterprise-level .NET applications** while leading and mentoring junior developers. You will work closely with **cross-functional teams** to build scalable, high-performance applications using the latest .NET technologies.

Key Responsibilities

Software Development & Architecture

- Design, develop, and maintain **high-performance web and desktop applications** using **C#, .NET Core/.NET Framework, and ASP.NET MVC/Web API**.
- Architect and implement **scalable, secure, and maintainable software solutions**.
- Optimize application performance, database queries, and API interactions.
- Integrate third-party APIs, cloud services, and microservices architectures.

Technical Leadership & Mentoring

- Provide **technical guidance and mentorship** to junior and mid-level developers.
- Conduct **code reviews, enforce coding standards, and improve best practices**.
- Collaborate with product managers, business analysts, and UI/UX teams to translate requirements into robust technical solutions.

Database & Backend Development

- Design and optimize **SQL Server databases** including stored procedures, indexing, and performance tuning.

- Implement **Entity Framework, Dapper, or other ORM solutions.**

DevOps, Security & Deployment

- Work with **CI/CD pipelines**, automate deployment processes, and manage cloud-based environments (**Azure, AWS**).
- Ensure **secure coding practices** and compliance with industry standards.
- Monitor application performance and implement logging and error-handling strategies.

Required Qualifications

- **5+ years of experience** in .NET development.
- Expert in **C#, ASP.NET Core/.NET Framework, MVC, Web API, and RESTful services.**
- Strong experience with **Microsoft SQL Server, Entity Framework, and database design.**
- Proficiency in **frontend technologies** such as **JavaScript, TypeScript, Angular, React, or Blazor.**
- Experience with **Azure or AWS cloud services** (App Services, Functions, Containers).
- Strong knowledge of **OOP, SOLID principles, design patterns, and microservices architecture.**
- Experience with **CI/CD pipelines, DevOps, and containerization (Docker, Kubernetes).**
- Proficiency in **Git, Agile methodologies, and unit testing frameworks.**
- Excellent problem-solving, debugging, and troubleshooting skills.

Preferred Qualifications

- Experience with **NoSQL databases (MongoDB, Redis, CosmosDB).**
- Familiarity with **GraphQL, gRPC, and real-time communication (SignalR, WebSockets).**
- Knowledge of **AI/ML integration with .NET applications.**
- Microsoft Certified: **Azure Developer Associate or .NET Developer.**

Why Join Us?

- Work on **cutting-edge .NET applications** with modern cloud technologies.
- Competitive salary, performance bonuses, and benefits.
- Opportunity to lead and mentor a dynamic development team.

- Flexible work arrangements and career growth opportunities.

If you are passionate about software development and want to lead exciting .NET projects, we'd love to hear from you!
